MEMORANDUM

TO: Child Nutrition Directors
    Public Schools
    Private Schools
    RCCIs

FROM: June Barrett, Program Coordinator
       Child Nutrition Programs

Date: May 29, 2015

RE: Voluntary Menu Labeling in the National School Lunch and School Breakfast Program

The attached memorandum SP 36-2015, CACFP 17-2015, SFSP 19-2015 addresses the published final rule, “Nutrition Labeling of Standard Menu Items in Restaurants and Similar Retail Food Establishments” in the Federal Register (79 FR 71155) by the U.S. Department of Health and Human Services, Food and Drug Administration (FDA). Under this new FDA regulation, it requires the following:

- Restaurants and retail operators must provide calorie statements for all standard menu items and make available nutritional information for 11 nutrients of those menu items.

- Schools operating under the National School Lunch or Breakfast Program, institutions operating the Child and Adult Care Food Program, and sponsors operating the Summer Food service Program are not required to implement these requirements.

- Child Nutrition Program operators may choose to voluntarily implement similar initiatives.

Please review attached memos thoroughly for further guidance. If you have any questions concerning this correspondence, please contact the School Program Staff at 334-242-8228. Thank you for your cooperation.

SUBJECT: Voluntary Menu Labeling in the National School Lunch and School Breakfast Program

TO: Regional Directors
Special Nutrition Programs
All Regions

State Directors
Child Nutrition Programs
All States

The U.S. Department of Health and Human Services, Food and Drug Administration (FDA) published the final rule, *Nutrition Labeling of Standard Menu Items in Restaurants and Similar Retail Food Establishments* in the Federal Register (79 FR 71155) on December 1, 2014. This rule requires that calorie information be listed on menus and menu boards in chain restaurants, and similar retail food establishments with 20 or more locations to provide consumers with more nutritional information about the foods they eat outside of the home. The purpose of the FDA rule is to make nutrition information available to consumers in a direct and accessible manner to enable them to make informed and healthful dietary choices. The rule becomes effective December 1, 2015.

Under this new FDA regulation, restaurants and retail store operators must print a calorie statement on menus for all standard menu items. They also must make available, upon request, nutrition information for 11 nutrients for these menu items. The nutrients that must be made available include: total calories, calories from fat, total fat, saturated fat, trans fat, cholesterol, sodium, total carbohydrates, dietary fiber, sugar, and protein.

Schools operating under the National School Lunch or Breakfast Program are specifically excluded by this new rule, as are institutions operating the Child and Adult Care Food Program and sponsors operating the Summer Food Service Program, and therefore are not required to implement these requirements. However, Child Nutrition Program operators may voluntarily implement similar initiatives.

Making nutrition information available to students and parents may help students make more informed choices about the foods they select and consume at school. Schools may already have much of this nutritional information on hand for reimbursable meals served at school and for a la carte Smart Snacks sold on campus in the form of standardized recipes, and food product labels. Schools may find that making some or all of this information available is fairly easy.
