August 13, 2012

MEMORANDUM

TO: City and County Superintendents of Education

FROM: Thomas R. Bice 
State Superintendent of Education

RE: Green Ribbon Schools Award

The Alabama State Department of Education (ALSDE) is proud to partner with the U.S. Department of Education to nominate up to three public schools and one private school for the 2013 Green Ribbon Schools Award. Alabama was honored to have two national winners of the 2012 Green Ribbon Schools Award, Winterboro High School and Munford Elementary School. Both schools are located in the Talladega County School System.

This award recognizes schools taking a comprehensive approach to greening their school, which incorporates environmental learning with improving environmental and health impacts. Becoming a U.S. Department of Education Green Ribbon School is a two-step process. The first step is to complete and submit the application form to the ALSDE no later than December 21, 2012. The Alabama Green Ribbon Schools Advisory Committee will review the applications to select up to three public schools and one private school with exemplary green schools practices. The second step of the process requires the ALSDE nomination packets with the selected applications be reviewed by the U.S. Department of Education.

I encourage schools with green schools practices to complete an application. Resources and additional applications may be obtained from http://alex.state.al.us/grs.html. If you have any questions regarding the application process or require assistance in completing the application, please contact Mrs. Shirley J. Farrell at 334-242-8317 or via e-mail at sfarrell@alsde.edu, or Mrs. Martha Anne Allison at 334-353-1258 or via e-mail at mallison@alsde.edu.

FY12-2113
AL & ED-GRS Application

Thank you for your interest in completing the Alabama application for nomination to U.S. Department of Education Green Ribbon Schools (ED-GRS). In order to complete this application, you will need to collect data about your school’s facility, health and safety policies; food service; and environmental and sustainability curriculum.

ED-GRS recognizes schools taking a comprehensive approach to greening their school. A comprehensive approach incorporates environmental learning with improving environmental and health impacts. Becoming a U.S. Department of Education Green Ribbon School is a two-step process. The first step is to complete and submit this form to be selected as a nominee by an eligible nominating authority. The second step of the process requires signatures for the nominee package that will be sent to the U.S. Department of Education (ED).

ED selects honorees from those presented by eligible nominating authorities nationwide. Selection will be based on documentation of the applicant’s high achievement in the three ED-GRS Pillars:

Pillar I: Reduce environmental impact and costs.
Pillar II: Improve the health and wellness of students and staff.
Pillar III: Provide effective environmental and sustainability education, incorporating STEM, civic skills and green career pathways.

Schools demonstrating exemplary achievement in all three Pillars will receive highest rankings. It is important to document concrete achievement. It will help you to assemble a team to complete the application. This team might include: a facilities manager, physical education director, food services director, curriculum director, finance department representatives, teachers and students. You should consult the ED-GRS resources page for standards, programs and grants related to each Pillar, Element and question. This is an excellent clearinghouse of resources for all schools, not just those who apply.

The questions in this application will help you demonstrate your high achievement in these Pillars as well as provide space for you to include pertinent documentation. You will receive points when you provide documentation for your answers. **E-mail completed applications to sfarrell@alsde.edu on or before the deadline of December 21, 2012. Any application received after December 21, 2012, will not be accepted. If you have any questions regarding the application process, please contact Mrs. Shirley J. Farrell at 334-242-8317 or Mrs. Martha Anne Allison at 334-353-1258.**

Note that if selected for nomination to ED-GRS, the school principal and district superintendent must be prepared to certify that each of the statements below concerning the school’s eligibility and compliance with the following requirements is true; however, in no case is a private school required to make any certification with regard to the public school district in which it is located.

1. The school has some configuration that includes one or more of grades K-12. (Schools on the same campus with one principal, even a K-12 school, must apply as an entire school.)
2. The school has been evaluated and selected from among schools within the Nominating Authority’s jurisdiction as highest achieving in the three ED-GRS Pillars: 1) reduced environmental impact and costs; 2) improved health and wellness; and 3) effective environmental and sustainability education.

3. Neither the nominated public school nor its public school district is refusing the U.S. Department of Education Office of Civil Rights (OCR) access to information necessary to investigate a civil rights complaint or to conduct a district wide compliance review.

4. OCR has not issued a violation letter of findings to the public school district concluding that the nominated public school or the public school district as a whole has violated one or more of the civil rights statutes. A violation letter of findings will not be considered outstanding if OCR has accepted a corrective action plan to remedy the violation.

5. The U.S. Department of Justice does not have a pending suit alleging that the public school or the public school district as a whole has violated one or more of the civil rights statutes or the Constitution’s equal protection clause.

6. There are no findings of violations of the Individuals with Disabilities Education Act in a U.S. Department of Education monitoring report that apply to the public school or public school district in question; or if there are such findings, the state or public school district has corrected, or agreed to correct, the findings.

7. The school meets all applicable federal, state, local and tribal health, environmental and safety requirements in law, regulations and policy and is willing to undergo EPA on-site verification.

**Summary Narrative:** Provide an 800 word maximum narrative describing your school’s efforts to reduce environmental impact and costs; improve student and staff health; and provide effective environmental and sustainability education. Focus on unique and innovative practices and partnerships.

1. Is your school participating in a local, state or national school program which asks you to benchmark progress in some fashion in any or all of the Pillars?

   ( ) Yes ( ) No  Program(s) and level(s) achieved:

2. Has your school, staff or student body received any awards for facilities, health or environment?

   ( ) Yes ( ) No  Award(s) and year(s)

**Pillar I: Reduced Environmental Impact and Costs**

**Energy**

1. Can your school demonstrate a reduction in Greenhouse Gas emissions?

   ( ) Yes ( ) No  Percentage reduction:  Over (m/yy - m/yy):

   Initial GHG emissions rate (MT eCO2/person):
Final GHG emissions rate (MT eCO2/person): ____________________________

Offsets: ____________________________ How did you calculate the reduction? ____________________________

2. Has your school received EPA ENERGY STAR certification or does it meet the requirements for ENERGY STAR certification?

( ) Yes ( ) No  Year(s) and score(s) received: ____________________________

3. Has your school reduced its total non-transportation energy use from an initial baseline? ( ) Yes ( ) No

Current energy usage (kBTU/student/year): ____________________________

Current energy usage (kBTU/sq. ft./year): ____________________________

Percentage reduction: ____________________________ over (mm/yy - mm/yy): ____________________________

How did you document this reduction? ____________________________

4. What percentage of your school's energy is obtained from:

On-site renewable energy generation: ________ Type ____________________________

Purchased renewable energy: ________ Type ____________________________

Participation in USDA Fuel for Schools, DOE Wind for Schools or other federal or state school energy program: ____________________________

5. In what year was your school originally constructed? ____________________________

What is the total building area of your school? ____________________________

6. Has your school constructed or renovated building(s) in the past ten years? ( ) Yes ( ) No

For new building(s): Percentage building area that meets green building standards: ____________________________

Certification and level: ____________________________ Total constructed area: ____________________________

For renovated building(s):
Percentage of the building area that meets green building standards: ________

Certification and level: ____________________________ Total renovated area: ____________________________
Water and Grounds

7. Can you demonstrate a reduction in your school's total water consumption from an initial baseline?

   Average Baseline water use (gallons per occupant): ____________
   Current water use (gallons per occupant): ______________________
   Percentage reduction in domestic water use: _______________________  
   Percentage reduction in irrigation water use: _______________________
   Time period measured (mm/yyyy - mm/yyyy): ______________________

   How did you document this reduction (ie. ENERGY STAR Portfolio Manager, utility bills, school district reports)?: _______________________

8. What percentage of your landscaping is considered water-efficient and/or regionally appropriate?: ______

   Types of plants used and location: ________________________________

9. Describe alternate water sources used for irrigation. (50 words max)

   ________________________________

10. Describe any efforts to reduce stormwater runoff and/or reduce impermeable surfaces. (50 words max)

    ________________________________

11. Our school's drinking water comes from: ( ) Municipal water source ( ) Well on school property ( ) Other:

    ________________________________

12. Describe how the water source is protected from potential contaminants. (50 words max)

    ________________________________

13. Describe the program you have in place to control lead in drinking water. (50 words max)

    ________________________________

14. What percentage of the school grounds are devoted to ecologically beneficial uses?

    ________________________________ (50 word max)
Waste

15. What percentage of solid waste is diverted from landfilling or incinerating due to reduction, recycling and/or composting? Complete all the calculations below to receive points.

A - Monthly garbage service in cubic yards
   (garbage dumpster size(s) x number of collections per month x percentage full when emptied or collected): _________________________

B - Monthly recycling volume in cubic yards
   (recycling dumpster sizes(s) x number of collections per month x percentage full when emptied or collected): _________________________

C - Monthly compostable materials volume(s) in cubic yards
   (food scrap/food soiled paper dumpster size(s) x number of collections per month x percentage full when emptied or collected): _________________________

Recycling Rate = ((B + C) ÷ (A + B + C) x 100): _________________________

Monthly waste generated per person = (A/number of students and staff): _________________________

16. What percentage of your school’s total office/classroom paper content is post-consumer material, fiber from forests certified as responsibly managed and/or chlorine-free? _________________________

17. List the types and amounts of hazardous waste generated at your school:

<table>
<thead>
<tr>
<th>Flammable liquids</th>
<th>Corrosive liquids</th>
<th>Toxics</th>
<th>Mercury</th>
<th>Other:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

How is this measured? ______________________________________________________________________

How is hazardous waste disposal tracked? ______________________________________________________________________

Describe other measures taken to reduce solid waste and eliminate hazardous waste. (100 word max)
___________________________________________________________________________________________

18. Which green cleaning custodial standard is used? _________________________

What percentage of all products is certified? _________________________
What specific third party certified green cleaning product standard does your school use?

________________________________________________________________________

Alternative Transportation

19. What percentage of your students walk, bike, bus, or carpool (2 + student in the car) to/from school? (Note if your school does not use school buses) __________________________________________________________

How is this data calculated? (50 word max) __________________________________

20. Has your school implemented?

[ ] designated carpool parking stalls.

[ ] a well-publicized no idling policy that applies to all vehicles (including school buses).

[ ] Vehicle loading/unloading areas are at least 25 feet from building air intakes, doors, and windows.

[ ] Safe Pedestrian Routes to school or Safe Routes to School

Describe activities in your safe routes program: ____________________________________________ (50 word max)

21. Describe how your school transportation use is efficient and has reduced its environmental impact. (50 word max) __________________________________________________________

22. Describe any other efforts toward reducing environmental impact, focusing on innovative or unique practices and partnerships. (100 word max)

________________________________________________________________________

Pillar 2: Improve the health and wellness of students and staff

Environmental Health

1. What is the volume of your annual pesticide use (gal/student/year)? Describe efforts to reduce use:

________________________________________________________________________

2. Which of the following practices does your school employ to minimize exposure to hazardous contaminants? Provide specific examples of actions taken for each checked practice.

[ ] Our school prohibits smoking on campus and in public school buses.
[ ] Our school has identified and properly removed sources of elemental mercury and prohibits its purchase and use in the school.

[ ] Our school uses fuel burning appliances and has taken steps to protect occupants from carbon monoxide (CO).

[ ] Our school does not have any fuel burning combustion appliances.

[ ] Our school has tested all frequently occupied rooms at or below ground level for radon gas and has fixed and retested all rooms with levels that tested at or above 4 pCi/L OR our school was built with radon resistant construction features and tested to confirm levels below 4 pCi/L.

[ ] Our school has identified any wood playground or other structures that contain chromate copper arsenate and has taken steps to eliminate exposure.

3. Describe how your school controls and manages chemicals routinely used in the school to minimize student and staff exposure. (100 word max)

4. Describe actions your school takes to prevent exposure to asthma triggers in and around the school. (100 word max)

5. Describe actions your school takes to control moisture from leaks, condensation, and excess humidity and promptly cleanup mold or removes moldy materials when it is found. (100 word max)

6. Our school has installed local exhaust systems for major airborne contaminant sources. ( )Yes ( )No

7. Describe your school’s practices for inspecting and maintaining the building’s ventilation system and all unit ventilators to ensure they are clean and operating properly. (100 word max)

8. Describe actions your school takes to ensure that all classrooms and other spaces are adequately ventilated with outside air, consistent with state or local codes, or national ventilation standards. (100 word max)
9. Describe other steps your school takes to protect indoor environmental quality such as implementing EPA IAQ Tools for Schools and/or conducting other periodic, comprehensive inspections of the school facility to identify environmental health and safety issues and take corrective action. (200 word max)

Nutrition and Fitness

10. Which practices does your school employ to promote nutrition, physical activity and overall school health? Provide specific examples of actions taken for each checked practice, focusing on innovative or unique practices and partnerships. (100 word max each)

   [ ] Our school participates in the USDA's HeathierUS School Challenge. Level and year:

   [ ] Our school participates in a Farm to School program to use local, fresh food.

   [ ] Our school has an on-site food garden.

   [ ] Our school garden supplies food for our students in the cafeteria, a cooking or gardening class or to the community.

   [ ] Our students spent at least 120 minutes per week over the past year in school supervised physical education.

   [ ] At least 50% of our students' annual physical education takes place outdoors.

   [ ] Health measures are integrated into assessments.

   [ ] At least 50% of our students have participated in the EPA's Sunwise (or equivalent program).

   [ ] Food purchased by our school is certified as "environmentally preferable"

   Percentage: _____  Type: ____________________________

11. Describe the type of outdoor education, exercise and recreation available. (100 word max)

12. Describe any other efforts to improve nutrition and fitness, highlighting innovative or unique practices and partnerships. (100 word max)
Pillar 3: Effective Environmental and Sustainability Education

1. Which practices does your school employ to help ensure effective environmental and sustainability education? Provide specific examples of actions taken for each checked practice, highlighting innovative or unique practices and partnerships.
   [ ] Our school has an environmental or sustainability literacy requirement. (200 word max)

   [ ] Environmental and sustainability concepts are integrated throughout the curriculum. (200 word max)

   [ ] Environmental and sustainability concepts are integrated into assessments. (200 word max)

   [ ] Students evidence high levels of proficiency in these assessments. (100 word max)

   [ ] Professional development in environmental and sustainability education are provided to all teachers. (200 word max)

2. For schools serving grades 9-12, provide:
   
   Percentage of last year's eligible graduates who completed the AP Environmental Science course during their high school career: ___________
   Percentage scoring a 3 or higher: ________________

3. How does your school use sustainability and the environment as a context for learning science, technology, engineering and mathematics thinking skills and content knowledge? (200 word max)

4. How does your school use sustainability and the environment as a context for learning green technologies and career pathways? (200 word max)
5. Describe students’ civic/community engagement projects integrating environment and sustainability topics. (200 word max)

6. Describe students’ meaningful outdoor learning experiences at every grade level. (200 word max)

7. Describe how outdoor learning is used to teach an array of subjects in contexts, engage the broader community, and develop civic skills. (200 word max)

8. Describe your partnerships to help your school and other schools achieve in the 3 Pillars. Include both the scope and impact of these partnerships. (Maximum 200 words)

9. Describe any other ways that your school integrates core environment, sustainability, STEM, green technology and civics into curricula to provide effective environmental and sustainability education, highlighting innovative or unique practices and partnerships. (Maximum 200 words)

10. Submit up to five photos that illustrate your green practices.
