March 15, 2020

Dear Colleagues:

Thank you for your extraordinary leadership over the last week and your ongoing efforts to lead your communities during the continuously evolving COVID-19 pandemic. While there is no blueprint for how to respond to a health crisis of this magnitude, the ALSDE team is joining many leaders of state and district education systems across the country to meet students’ basic needs, minimize disruptions, and provide academic instruction while responding to breaking developments in real time.

As you continue to facilitate the efforts to safeguard your schools from the spread of the virus, I appreciate your patience and flexibility as we try to provide you with the most current information and resources you may need during this time. The ALSDE is reviewing all possible impacts of the school closure, and we understand that you have many technical questions. Through ongoing communication efforts, we will continue to clarify questions you have, update you as new information is shared, and provide you with resources to assist you.

The U.S. Department of Agriculture (USDA) has approved ALSDE’s waiver to grant approval for Alabama to provide meals during an unanticipated school closure due to the COVID-19 at both school and non-school sites and in a non-congregate setting. Please make every effort to provide meals for all children who need them, no matter their resources and no matter what school they attend, in the way that works best for your community, such as grab-and-go or delivery while also maintaining social distancing.

This is an unprecedented event in our lifetime. This public health emergency is evolving rapidly, and we will continue to inform you as quickly as information becomes available. To assist you with this everchanging landscape, you may access updates at the Alabama Department of Public Health at www.alabamapublichealth.gov/infectiousdiseases/index.html or 1-800-338-8374. Additionally, the ALSDE is developing email addresses for both the general public and school officials to submit Emergency School Closure questions. We know information is changing daily, so the ALSDE is committed to continuously monitoring these questions submitted and will be answered and updated on a consistent basis. We will communicate these email addresses by the end of the day Monday, March 16, 2020, and we ask that you share these through your social media outlets. Updates will be provided as necessary. We will get through this as we continue to work together for “Every Child. Every Chance. Every Day.”

Sincerely,

State Superintendent of Education

Eric Mackey
COMPREHENSIVE EMERGENCY SCHOOL CLOSURE GUIDANCE

ACTIVITIES All school-sponsored activities scheduled during the statewide school closure are suspended until April 30, 2020. The AHSAA’s most recent issued guidance allows AHSAA-sanctioned activities to continue through Tuesday, March 17, 2020.

ASSESSMENTS, ACCOUNTABILITY, AND CHRONIC ABSENTEEISM The U.S. Department of Education has communicated that it will make waivers available for assessments and accountability. Obviously, no state testing will take place during the closure period. The ALSDE will work in partnership with stakeholders to determine next steps for Alabama to accommodate the school closure period. Also, many, but not all, juniors have completed the state-sponsored ACT. The ALSDE is committed to working with vendors to identify additional testing opportunities. Additional information regarding assessment timelines will be provided as they become available.

CAREER & TECHNICAL EDUCATION During the state-mandated school closure, CTE centers and programs will remain closed.

✓ Continuing Apprenticeships, Internships, etc.: As a general rule when school is closed, ALL related activities are also closed.

CONTINUITY OF EDUCATION LEAs have full autonomy to provide optional continuous learning opportunities during the state-mandated school closure. If you are planning to provide optional learning opportunities, your procedures should align with those utilized to during summer breaks or other “school calendar breaks”. Consider this situation similar to assisting with the prevention of the “Summer Slide”. Use the same parameters when distributing resources, providing multiple communication efforts, and ensuring the focus is on additional enrichment that can help to decrease a “gap” or “slide” in learning during this time when school is CLOSED. The following descriptions may be beneficial when communicating your instructional plan:

✓ E-Learning (eDay): These learning opportunities are days that require students to work at home, to complete their work electronically, and don’t require their physical attendance in school buildings. An eDay is recognized by the ALSDE as a “regular day of instruction”. During the mandated statewide school closure, eDays are not permissible because schools are closed.

✓ Digital & Hard Copy Learning (Blended): Schools may use a digital platform such as Google Classroom or a Learning Management System (Canvas, Schoology, etc.) to provide access to learning opportunities for students during the statewide school closure. If you utilize a digital learning option, you should provide hard copies for students and parents/guardians as needed. Providing both of these options to access materials lends itself to equitable access for all students and parents who may or may not have technology or internet services at home. Ensure that additional copies are provided in the school’s front office (if applicable), and please stress the importance of working collaboratively with parents during this time. If your district is providing meal service, provide hard copies of instructional materials in this location for easy access. If you plan to provide learning opportunities, remember that there are students and geographic areas that may not have access to technology-based options.
Virtual Learning: Formal online education program for students to learn through a total online learning environment/platform.

Alternative Learning Options/Accommodations: Alternative assignments or accommodations should be made for students who do not have technology and internet access. (i.e. extended deadlines, extra time for completion of assignments).

AMSTI & ARI State and Regional Staff Support: We are committed to providing Alabama educators with ongoing support. Staff will be available from 9:00 -12 noon each day to provide virtual coaching, professional learning, and resources for teachers. Other hours may also be available upon request.

Special Note Concerning Online/Virtual/eDay Learning Opportunities: E-learning can be utilized as simply a part of a traditional classroom education model or as part of a full online/virtual learning program. LEAs should note that anytime schools are “open”, access to services must be equally provided, including to students who do not have access to technology and students receiving special education services. This means that schools are only “open” if educational services are being delivered to all students in any form, i.e. traditional classroom models, eDays, or full virtual learning programs. As the period of closure through April 6, 2020, is reassessed, ALSDE expects to immediately assemble a small task force to consider varying levels of capacity across the state to reopen schools without physically requiring students to report to the districts.

LESSON GUIDANCE: There are a multitude of “free” resources that have been shared on social media. However, they may or may not be beneficial or accessible to the learning needs of your students. Use this real-world event to provide innovative learning opportunities for students to learn through venues opportunities that they be aligned to Alabama standards, are accessible through a variety of methods, and allow students to demonstrate mastery through multiple options (writing, project-based, etc.).

K-12 Standards-Based & Grade-Aligned Instructional Resources: The ALSDE Office of Student Learning (OSL) has developed an optional “Distance Learning Resource” platform to assist LEAs with planning efforts to provide instructional opportunities for grades K-12 by grade-band and by subject. You can access resources here: https://drive.google.com/open?id=1DUbLvpn6CXifqe-G-OijnchYQv-4uB3K

- General information
- Parent communication resources
- Standards-based instructional materials
- Alabama-aligned instructional resources

Additional Ideas:

- Send library books home with students and/or print out articles, poetry, and writing prompts;
- Assign a long-term research-based project aligned to multiple standards;
- Put together learning packets to review or enhance material already taught;
- Print and upload supplemental lessons that one often does not have time to do in class or additional practice in subject and skill areas that have not been mastered (Example: fractions, multiplication tables, read aloud);
• Have students write reflection essays about a movie watched or a book read and scaffold the assignment for different age ranges;
• Assign journal writing with a rubric and expectations to capitalize on this real-world learning experience (use this time to have students write about their experiences, their feelings, and draw conclusions or inferences based on their experiences during this time).

GRADUATION Ensuring that the Class of 2020 is on track to graduate is an important priority. Schools should take this opportunity to review the status of each senior to determine the extent to which the student has met graduation requirements for the Class of 2020. It is important that schools understand the needs of each of their students and have, to the extent possible, a plan to help each student complete these requirements during the remainder of the school year, both during the closure period (as practicable) and at such time as school may resume. Should the current situation change, the Department of Education will provide additional information. Our commitment is to provide reasonable flexibility in the interest of doing what is right for students.

FACILITIES During this time, district leaders should limit physical access to essential personnel, including school staff and others such as outside contractors, maintenance, etc.

FEDERAL FUNDING Federal Funding will continue as usual and will not be impacted by the school closure.

MULTILINGUAL EDUCATION RESOURCES https://switchboardta.org/blog/a-round-up-of-multilingual-resources-on-covid-19/

SPECIAL EDUCATION SERVICES When instructional opportunities are offered to all students, including alternate delivery models like online learning or distance learning, then districts are required to provide students with disabilities special education services. If, however, a student with a disability cannot access the alternate delivery models being offered to general education students, then the district should consult with parents and/or caregivers to determine the needs of the student and identify the most appropriate means for meeting those needs during the closure period.

✓ IEP Meetings, Hearings, Due Process/Mediations: Further guidance will be issued by end of the day on Monday, March 16, 2020.

MEDICATION Districts must ensure families have access to needed medication stored in the school or nurses’ office, which may include parent pickup of needed medication during statewide school closure.

NUTRITION ALSDE USDA’s waiver to provide meals during school closures has been approved. Districts that choose to participate during this time will need to follow the Summer Food Service Program, Seamless Summer Option (SSO), or complete an application to be a Summer Food Service Program provider. The ALSDE will be processing applications and provide additional guidance following USDA correspondence on Monday, March 16, 2020.
**POWERSCHOOL MIGRATION** We are collaborating with PowerSchool staff to determine what options the ALSDE has regarding the June 5, 2020, migration date, which requires all your LEA data to be correct and entered prior to the July 13, 2020, rollover date. We will provide updates as soon as they are available.

**STAFFING** LEAs have authority to make staffing decisions during this time. Each LEA has unique needs, and we ask that you work closely with your administrators and legal team to meet the needs of your community. Based on the Governor’s guidance for state government employees on March 15, you should consider implementing telework, flexible work schedules, and other techniques for accomplishing necessary duties to maintain LEA essential operations such as technology, CNP, finance, human resources/personnel and communication staff. Additionally, you should provide consistent guidance and expectations (checking emails, working on paperwork, coming to the building, etc.) for all employees during the school closure. Remember to stress social distancing in all situations.
**ALSDE COVID 19 UPDATES & GUIDANCE: MONDAY, MARCH 16, 2020**

**ADVANCED PLACEMENT (AP) ASSESSMENT UPDATES** Today, the College Board sent a direct email to AP teachers, AP coordinators, principals, and district staff that directs them to the new AP Central page. It has been updated (apcentral.collegeboard.org/about-ap/news-changes/coronavirus-update) with information regarding flexible testing options for schools experiencing substantial disruption or closure and guidance for schools that plan to maintain **OPTIONAL** AP instruction while students are at home. Additional resources that AP teachers may use during this time include: Free, daily online practice in the AP classroom to check for student understanding of each topic and skill in the AP course and ensure that students are well prepared for exam day can be accessed in the one-page overview (.pdf/514KB); **Foundations.** Learn how AP Classroom complements the new AP course and exam descriptions and offers students opportunities for practice and feedback throughout the year; **AP Classroom Demo.** See a click-through demonstration of AP Classroom, which highlights how to assign, score, and interpret results from Topic Questions, Personal Progress Checks, and teacher-created assignments and quizzes from the AP Question Bank; and **AP Quick Start Videos.** Short tutorials on recent features. In April, free online video lessons developed by AP teachers will be available for AP topics and skills typically taught in the final weeks of each AP course.

**CODING ATTENDANCE.** For questions regarding coding student absences on 3/16/20 – 3/18/20 (if your LEA was open), contact Dr. Marilyn Lewis in Prevention and Support Services at mlewis@alsde.edu.

**ALSDE COVID-19 EMERGENCY SCHOOL CLOSURE QUESTIONS** The following information was posted today at https://www.alsde.edu/covid-19 and can be shared with your staff and community to use to pose questions for the ALSDE. “In an effort to maintain ongoing communication efforts during this time when “social distancing” is critical, the Alabama State Department of Education (ALSDE) has developed COVID-19 email addresses for parents and school employees. As new developments occur, we hope this method can be used to submit your COVID-19 related questions. ALSDE staff will be continuously monitoring submissions and will provide responses in a timely manner. We will continue to work through this together to support “Every Child, Every Chance, Every Day.”

If you are a parent and have a COVID-19 related question, click COVID19PARENTS@ALSDE.EDU. If you are a school employee and have a COVID-19 related question, click COVID19SCHOOLS@ALSDE.EDU.

**CNP GUIDANCE FOR FOOD SERVICES DURING COVID-19** The Child Nutrition Program (CNP) Meal Service Guidance During COVID-19 ALSDE Memorandum FY20-1006 was finalized today and will be posted in the ALSDE Memoranda Site for your convenience.

**SPECIAL EDUCATION SERVICES GUIDANCE RELATED TO DEADLINES DURING COVID-19** Crystal Richardson, SES Coordinator, provided the following to LEA Special Education Coordinators today: “Please refer to the previously provided OSEP Q&A for information related to school closures and students with disabilities. **We are still waiting on specific guidance from OSEP regarding timelines.** IEP Teams are not required to meet and staff are not required to complete evaluations during Governor Ivey’s mandated school closure. Please make concentrating on health and safety and communicating with staff and families a priority during this time. We will provide updates on an ongoing basis.”

*UPDATED 3-20-2020*
ALSDE COVID 19 UPDATES & GUIDANCE: FRIDAY, MARCH 20, 2020

FEDERAL GUIDANCE FOR STATE ASSESSMENTS & ACCOUNTABILITY
Due to extraordinary circumstances created by the COVID-19 pandemic and school closures, today the USDOE officially provided flexibility for all states to request a waiver for the 2019-2020 school year, specifically related to the following:

✓ ESSA statewide assessment requirements (requirements to administer all required assessments in 2019-2020 school year);
✓ Federal Accountability and school identification requirements (CSI, TSI, & ATSI) for the 2019-2020 school year;
✓ All schools identified as CSI, TSI, and ATSI will maintain that identification status in the 2020-2021 school year AND continue to receive supports and interventions consistent with the plans currently approved the ALSDE’s Office of School Improvement (OSI); and
✓ Federal report card requirements related to certain assessments and for 2019-2020 school year in section 1111(h) of ESSA based on data from the 2019-2020 school year.

The ALSDE submitted our waiver today, and the USDOE staff has committed to providing a response within one business day. We will provide updates as they become available.

SUPERINTENDENT’S EXTENDING ACCESS TO LEARNING (SEAL) TASK FORCE
Dr. Mackey convened the Alabama SEAL Task Force this week to address short- and long-term priorities related to reopening Alabama schools. This task force is comprised of educators and business stakeholders throughout the state and is representative of our diverse education population. This advisory group identified the following critical components that will assist Dr. Mackey in his work to reopen Alabama schools:

✓ Multiple school reopening options for local districts to consider (if unable to reopen April 6);
✓ School systems’ capacity to reopen with alternative delivery methods; and
✓ PowerSchool (SIS) rollout options.

As of Friday afternoon, approximately 135 local districts have completed the “reopening options” survey. The task force will reconvene next week to continue discussions surrounding school reopening options and to make recommendations to Dr. Mackey regarding next steps for short- and long-term priorities. The task force further divided into 5 subcommittees to begin addressing specific subcomponents related to effectively reopening Alabama schools:

✓ Reopening Alabama School Logistics,
✓ Prioritizing Grade(s) & Course Completion Requirements,
✓ State & Federal Impacted Initiatives,
✓ Alignment of Business/Agency Partners Assistance to ALSDE Priorities, and
✓ Extended Assess to Education Considerations.

Each subcommittee’s work is ongoing, along with weekly task force meetings (through virtual WebEx meetings) to assist us as we develop a comprehensive transition plan to reopen Alabama schools that meets the needs of all students and educators.

AMSTI KITS GUIDANCE DURING SCHOOL CLOSURE
Dr. Sandy Ledwell developed guidance and FAQs related to handling AMSTI kits during the COVID-19 pandemic. She shared this information with AMSTI Directors at each of the regional sites and other leaders, but it will also be posted on the ALSDE website with the COVID-19 section for those who would like to access it. If you have additional questions regarding AMSTI kits during this situation, please contact Dr. Ledwell at sledwell@alsde.edu.
**SPECIAL EDUCATION SERVICES (SES) GUIDANCE** The ALSDE Special Education Services section has participated in multiple webinars and other communication efforts with OSEP this week. Dr. Mackey and his leadership team also participated in a virtual conference earlier today with the USDOE and the Director of the Office of Special Education (OSEP), Laurie VadnerPloeg. While the USDOE did provide official federal guidance on assessment and accountability waivers, they did not provide any official federal guidance related to flexibility of IDEA requirements. They have developed a response team with their Office of General Counsel and are working on some possible official guidance to share soon. They are working on information related to, but not limited to, the following:

- Gathering distance learning options;
- Providing federal Technical Assistance (TA) centers accessibility;
- Assisting SEAs with the identification of what LEAs need to determine when schools reopen; and
- Required federal submission of SSIP data timelines, especially with Indicators 8 & 14.

**EARLY READING & MATH ASSESSMENT SYSTEM WORKSHOP UPDATE** With the COVID-19 pandemic, the ALSDE has been working with vendors to adjust the original plan to host face-to-face workshops. We hope to finalize details next week and to provide formal guidance describing an innovative virtual presentation model during the week of April 6 – 10, 2020. LEAs would have access to vendor presentations to view at their convenience, as well as an ALSDE email address to pose follow-up questions. All questions would be answered and posted by April 24, with the deadline to select the early math and reading assessment systems extended to May 8, 2020. We hope to have an official ALSDE Memorandum posted next week, but we want to ensure we have all the information finalized first. While we know that COVID-19 updates may impact our plan, we also want to ensure we are doing everything possible to provide these types of opportunities to LEAs. The early reading and math assessment system selection project is an example of the ALSDE’s commitment to make every effort to remove barriers, when possible, to prevent the delay of these opportunities during our continued response to a crisis. If there are no major changes, LEAs would have the funding soon after their May 8, assessment system selections and could begin working through LEA-specific logistics with vendors to begin implementing the early math and reading assessments in the 2020-2021 school year as originally planned.
